
POST DOCTORAL POSITION AT IAG-USP: WHAT YOU NEED TO KNOW

Welcome to the Postdoctoral Program at USP!

Your internship is ruled by Regulation 'Resolução CoPq 7406/17'. We recommend you to read it at:

<http://www.leginf.usp.br/?resolucao=resolucao-copq-no-7406-de-03-de-outubro-de-2017-2> (only in Portuguese)

The post-doctoral training at USP is independent of the funding agencies, and may even be carried out without a scholarship.

The management of all stages of the program is done via the USP Services Portal, accessing the menu 'Pesquisa' (research) / Atena system. You can access it with your USP ID and password here: <https://portalservicos.usp.br/>

If in the past you were a USP student or postdoc, your USP ID remains the same. If you are new here, you will receive your ID as soon as you are registered. This number will be your permanent identification with the university.

In the USP Services Portal mentioned above, you can request the USP card, post-doctoral period extension, completion, early termination, removal, as well as registering activities performed, dedicated hours, etc.

These are the main deadlines that you should not miss:

- extension request: up to 40 days before the project end date;
- final report submission: up to 60 days after project completion ((before entering the final report in the system, it is necessary to register the frequency for the certificate to be issued)

The system sends important notices by e-mail. Make sure that your e-mail address registered in the system is updated, and that the messages are not directed to your SPAM box.

If you want an USP email, you may request it at: <https://id.usp.br/>

Postdoctoral fellows have access to the IAG Chromebooks program to obtain individual laptop loans. Learn more at <https://www.iag.usp.br/chrome> (in Portuguese)

More information can be found at <http://www.iag.usp.br/pos-doutorado>
